Modern High School   (January 2014 - January 2015)
Secondary school Science   73.20%

PROJECTS

DESIGN AND IMPLEMENTATION OF AUTHENTICATION SYSTEM FOR SESSION PASSWORD USING COLOR AND IMAGES

Authentication is used for security purposes. Normally we use text password for authentication but to avoid cyber-attack we used 3 different scheme for authentication like graphical password, color scheme, a combination of images

E-HEALTH SMART PREDICTION SYSTEM USING DEEP LEARNING & MACHINE LEARNING APPROACH

This system will make the use of Deep Learning (GCN approach) and Data Base Management System to get the most accurate illness which can be associated with the patient's symptoms, GCN calculates the probability of disease, therefore the most accurate prediction can be obtained.
